

**Prof Jonathan Jansen**, President, Academy of Science of South Africa (ASSAf)

invites you to

The 11<sup>th</sup> ASSAf Presidential Roundtable Discussion titled

## **“The Implications of ChatGPT for Assessment in Higher Education”**

ChatGPT is a new language-based artificial intelligence (AI) technology developed by [OpenAI](#), that can understand and communicate in human language. ChatGPT has gained a lot of attention since its release in November 2022 and is already being integrated into various industries. Many in the field of higher education are curious to know how ChatGPT could be used to create authentic assessments to measure students' knowledge and skills. On the other hand, students could also use ChatGPT to write assignments etc., making it difficult for educators to detect cheating.

In response, the Academy of Science of South Africa (ASSAf) is hosting the 11<sup>th</sup> ASSAf Presidential Roundtable Discussion titled **“The Implications of ChatGPT for Assessment in Higher Education”**.

The panellists will include: **Dr Franci Cronjé (Research Associate, The IIE Vega School)**, **Dr Roze Phillips (Founder and CEO, Abundance at Work)** and **Prof Johannes Cronjé (Professor, Digital Teaching and Learning, Cape Peninsula University of Technology)**. We look forward to your participation as a guest.

The ASSAf Presidential Roundtables on Science, Scholarship and Society are evidence-based dialogues that bring together experts and stakeholders to address critical issues affecting society at large and are of interest to a broad audience. The roundtables are hosted by the Academy of Science of South Africa (ASSAf) and moderated by ASSAf's President, Prof Jonathan Jansen.
